The Computer Science Distinguished Lecture Series welcomes these eminent thinkers and innovators from academia and industry to the Homewood Campus. We invite you to hear about their cutting-edge research and to be inspired by how computer science is changing the world.

Refreshments are provided prior to the talk.

**NOVEMBER 4, 2014**  
Multiparty Computations, or How to Know if a Second Date is in Your Future  
Tal Rabin  
Research Staff Member and Manager of the Cryptographic Research Group, IBM

**NOVEMBER 13, 2014**  
Cloud Security: Threats, Challenges and Solutions  
Rafail Ostrovsky  
Professor of Computer Science and Director of Center for Information and Computation Security  
Henry Samueli School of Engineering and Applied Science, UCLA

**FEBRUARY 12, 2015**  
Randomness  
Avi Wigderson  
Professor, School of Mathematics, Institute for Advanced Study, Princeton

**APRIL 23, 2015**  
Genome Assembly: From Short to Long Reads  
Pavel Pevzner  
Ronald R. Taylor Chair Professor, Computer Science and Director, Center for Algorithmic and Systems Biology  
University of California, San Diego
