Assignment 2: Critique on medical device security paper

Instructor: Sujata Garera

Assigned on Feb 18th 2010, Due Date: March 9th 2010

Assignment policy: You must not collaborate on this assignment. You must submit your deliverables on the assigned due date. Late submissions will not be accepted.
Total Points: 30

For this assignment your task is to critique a paper on medical device security. You may chose a paper from the ones posted on the course website or from elsewhere. You should indicate why this paper interests you and briefly summarize its contributions. You should further discuss the strengths and weaknesses of the paper. Your critique should end with proposing two novel extensions of the paper. Your overall critique should be no longer than 3 pages. You will be evaluated based on the following:

- Defending the choice of paper
- Quality of summary
- Quality of strengths and weaknesses identified
- Novelty and motivation for extensions proposed
- Quality of writeup
