Assignment policy: You must not collaborate on this assignment. You must submit your deliverables on the assigned due date. Late submissions will not be accepted.
Total Points: 30

For this assignment your task is extend the wearable personal healthcare and emergency aid system WAITER which was discussed in class. You should briefly summarize its contributions and identify possible attacks an adversary may launch on the system. You should further discuss how you might extend the system to incorporate secure transmission of information and detail your protocol steps and assumptions. Your overall writeup should be no longer than 3 pages. You will be evaluated based on the following:

- Quality of summary
- Quality of attacks proposed
- Protocol designed
